EDUCATION

Bachelor of Science in Computer Science

Adamson University

2019-2024

(STEM) Senior High-School

Adamson University

2015-2019

SKILLS

Web Developer	Skillful
Analyst/Programmer	Skillful
PostgreSQL	Skillful
HTML	Skillful
JavaScript	Skillful
Java	Skillful
API Developer	Skillful
Python Programming	Skillful
MSSQL	Experienced
C#	Skillful
Firebase	Skillful
React.JS	Skillful
Node.JS	Skillful
CSS	Skillful

PROFILE

I am a Software Developer with a strong foundation in backend development and a degree in Computer Science from Adamson University. Over 1 year of professional experience at PNB Holdings Corporation as an API Developer which bridges the gap between front-end and backend, specializing in creating robust server-side applications and maintaining reliable web services. Proficient in programming languages such as HTML, Python, Java, SQL, and other programming languages, with expertise in developing scalable APIs and optimizing database performance. Demonstrated ability to collaborate with cross-functional teams to deliver high-quality software solutions on time. Passionate about leveraging technical skills to drive innovative web development projects and contribute to a fast-paced tech company.

EXPERIENCE

BACKEND DEVELOPER

Philippine National Bank | Mar 2025 - Mar 2026

- Designed, developed, and maintained middleware APIs serving as the integration layer between frontend applications and backend systems for Philippine National Bank (PNB).
- Implemented RESTful and SOAP API services to enable secure and efficient data exchange across multiple systems.
- Performed API testing, debugging, and performance optimization to ensure reliability, scalability, and adherence to best practices.
- Ensured data validation, error handling, and security compliance in API development.
- Assisted in deployment, monitoring, and ongoing maintenance of API services to support continuous operations.
- Developed UI/UX components for internal tools and Methods to enhance usability and user experience.

WEB DEVELOPER

Rizoma Technology Gmbh | Oct 2024 - Jan 2025

- Developed and maintained websites for various clients, ensuring functionality, performance, and user-friendly interfaces.
- Implemented responsive web designs to ensure compatibility across desktops, tablets, and mobile devices.
- Built and integrated functional web features, including forms, dynamic content, and basic database interactions.
- Collaborated with clients to gather requirements, provide technical solutions, and deliver customized websites based on their needs.
- Performed website testing, debugging, and maintenance to ensure smooth operation and improved performance.

MANAGER

Dynasty Organization | Aug 2021 - Jan 2022

- Managed team task allocation to ensure timely and efficient completion of assigned objectives.
- Administered and maintained online pages and community platforms, ensuring active and organized digital spaces.
- Moderated posts, comments, and discussions to enforce community guidelines and maintain a positive environment.

CERTIFICATES

CertiProf Scrum Foundation Certificate

CertiProf 94570406

Mar 5, 2024

Foundation of Operationalizing MITRE ATT&CK v13

Aug 29, 2023

Introduction to Cryptology for Beginners

Nov 3, 2023

IBM Design Thinking Practitioner Badge

Feb 29, 2024

IBM Design Thinking Team Essentials Badge

Mar 4, 2024

Vulnerability Assessment Certificate

Mar 15, 2024 (HTB Academy)

PROJECTS

MyFairee Full stack FERN Website (Internship)

- Developed and maintained the MyFairee website server, ensuring reliable performance and seamless functionality.
- Designed and programmed front-end and back-end components to support platform operations.
- Created and managed the database, optimizing structure and data management processes.
- Built and maintained APIs to enable smooth integration between the website, server, and database.
- Conducted testing, debugging, and updates to enhance usability and platform performance.

Unica Circuits 3D Calculator Website

- Developed a web-based tool that automatically calculates 3D printing costs from uploaded STL files.
- Implemented automated pricing logic based on model parameters to improve accuracy and consistency in cost estimation.
- Enabled faster quotation generation for Unica Circuit 3D printing services, reducing manual computation time.
- Integrated file upload processing and calculation features to streamline the pricing workflow for custom 3D prints.
- Improved operational efficiency by providing a user-friendly interface for instant pricing evaluation.

SPORTS MATCH PREDICTION ANALYSIS APPLYING MACHINE LEARNING MODEL WITH RULE-BASED APPROACH — Research Study

- Developed a sports match prediction system using a hybrid approach combining machine learning models and rule-based logic.
- Analyzed historical match data and performance metrics from the Philippine Basketball Association (PBA) and Premier Volleyball League (PVL).
- Designed algorithms to generate accurate match outcome predictions, supporting data-driven insights for teams and stakeholders.
- Implemented data preprocessing, feature engineering, and model evaluation to improve prediction reliability.
- Enhanced decision-making through a systematic and analytical approach to sports performance forecasting.

EVALUATION OF ETHANOL PROPERTY IN GRAPE SEAWEED (CAULERPA RACEMOSA) IN POTENTIAL BIOETHANOL PRODUCTION — Research Study

- This study was conducted to identify the total ethanolic percentage of Grape Seaweed. In that way, evaluation of the potential of grape seaweed as an alternative fuel is suggested. . Through the tests, comparison between the ethanolic property of Caulerpa racemosa and the ethanol that is commercially consumed was done.
